PROJECTS

- Hospital Management System** — *MERN Stack, Role-Based Access Control* Jan 2024 – Feb 2024
- Developed a hospital management system to manage hospitals, doctors, and patients with role-based access.
 - Implemented RESTful APIs in Node.js and Express.js, integrating MongoDB for secure data storage and retrieval.
 - Enabled hospital creation, updating, deletion, searching by city, and detail management.
 - GitHub: github.com/udayponnaganti
- Sales Tracker Website** — *React.js, Render* Sep 2024 – Dec 2024
- Developed a dynamic and responsive Sales Tracker website to manage sales records efficiently.
 - Built with React.js, including features for data visualization, filtering, and sorting.
 - Extensively used by students for academic tracking during COVID.
 - GitHub: github.com/udayponnaganti
- Hospital Management System UI/UX Design** — *Figma* Jan 2024 - June 2024
- Designed a high-fidelity UI/UX prototype for a Hospital Management System.
 - Created an intuitive user flow, dashboard layouts, appointment booking system, and doctor-patient interfaces.
 - Focused on accessibility, minimalistic design principles, and responsive structures.
 - Figma Link: [Figma Prototype](#)
